

COSI Connects Science Kits

The Ohio National Guard Youth Program is pleased to offer a **COSI Connects Science Kit to families FREE of CHARGE!**

The staff at COSI believe that science is everywhere. That is why they have created COSI Connects Science Kits – a themed kit with a week’s worth of STEM activities delivered right to your front door.

These kits come with every item and ingredient you need, so there would be no extra trips to the store or searches through the pantry. **Registration will close December 23, or while supplies last.** Available kits include:

| | |
|-------------------|---|
| HUMAN BODY | With this kit, you will learn a little bit more about a few of the body’s systems and how you can make healthy choices to take care of your own body. |
| ENERGY | Explore how energy is transformed from one form to another as you experiment, build, and create! |
| NATURE | Use the Nature Kit as your guide while you explore and learn about the science behind plants, animals and ecosystems (including those living in your own backyard). |
| SPACE | With the Space Kit, you can challenge yourself to build a rocket, design a moon base, and engineer the perfect parachute. |
| WATER | Water is all around us, and the Water Kit explores all sorts of water-related activities. |

How to order: To place your order for two of these FREE science kits that will be shipped to your home, please visit this link:
